Learn about new treatment options for seizures that are difficult to control, including Epidiolex. Two of the area’s top neurologists will be presenting; Dr. Callow will share information about treating adults while Dr. Standridge will share about treating children. Together they will educate and empower people to have hope in gaining seizure control.

The program will also be broadcast live on the Epilepsy Alliance Ohio Facebook page, audience participation is encouraged!

Food and drinks will be provided. Thanks to Opportunities for Ohioans with Disabilities for allowing us to use their training room.

RSVP at mfindley@epilepsy-ohio.org or to the Epilepsy Alliance at (877) 804-2241
